BX

KUBOTA DIESEL TRACTOR

BX1880/BX2380 BX2680/BX23S

Four sub-compact diesel tractors with the versatility to do any job in your yard or on your property.

Now Available with a Kubota Swift-Tach Loader and Kubota Swift-Connect Backhoe

Easier operation, superior comfort, and new and simpler systems for attaching and detaching implements that let you switch jobs like a pro!

Kubota invented the sub-compact diesel tractor so that even novices can comfortably and efficiently perform a variety of gardening, landscaping, and general property maintenance tasks. Now Kubota introduces the new BX80 Series, with improved operator comfort and the

new Kubota Swift-Tach Front Loader, you can quickly and easily remove the front loader without getting off the tractor. The BX23S comes equipped with Kubota's Swift-Connect Backhoe for all those digging jobs around the house and yard.

**KUBOTA SUB-COMPACT DIESEL TRACTOR SERIES
BX1880/BX2380/BX2680/BX23S**

A sub-compact tractor with the power and versatility to handle a wide range of jobs.

Smaller than a full-size tractor and easier to operate, the sub-compact BX80 Series has the power and versatility to take on your toughest gardening, landscaping, and property maintenance jobs. A fuel-efficient 3-cylinder diesel engine provides plenty of power to haul, climb, and pull your way through even the most challenging tasks. The new optional 2-lever quick coupler on the loader combined with Land Pride's 3-point quick hitch system lets you hook up to more front and rear implements, letting you handle a wider range of jobs. The BX Series even makes maintenance easier with a hood that fully opens to provide quick access to all serviceable areas of the engine.

COMPACT SIZE

With an overall length similar to a standard garden tractor, BX-Series tractors are easy to drive and can work smoothly even in tight spaces. The BX-Series' compact size also means they're gentle on turf. But don't be fooled by their compact dimensions—these tractors are powerful and capable of handling a wide variety of chores and projects.

PERFORMANCE-MATCHED KUBOTA DIESEL ENGINES

All the BX80 Series Tractors are powered by rugged engines built by Kubota exclusively for the BX Series. The BX1880 and BX2380/BX23S come with 16.6- and 21.6-horsepower diesel engines, while the BX2680 packs a 24.8-horsepower diesel engine under the hood. All three engines are 3-cylinder workhorses that offer power unparalleled for tractors this size...more than enough muscle to tackle even your toughest jobs.

METAL HOOD / FENDERS

Strong and durable, the BX-Series' metal hood and fenders resist dings and dents, ensuring that your BX tractor continues to look as good as it performs.

GROUND CLEARANCE

The BX-Series provides plenty of ground clearance - 8.3 inches for the BX1880, 8.9 inches for BX2380/BX2680/BX23S - to get you over rocks and other objects in your path.

VERSATILE CATEGORY I 3-POINT HITCH

The BX-Series feature a sturdy, hydraulically controlled Category I 3-point hitch that allows you to attach a wide variety of rear implements.

ROPS HEIGHT

The BX80-Series has a ROPS height of less than 7 feet (except BX23S) so you can drive the BX through most standard garage door openings without folding down the ROPS.

FULL OPEN HOOD

- A. QUARTER-INCHING VALVE
- B. BRIGHT HALOGEN HEADLIGHTS
- C. FRONT IMPLEMENT CONTROL VALVE
- D. REVERSE AIR FLOW
- E. LARGE FUEL TANK
- F. 4WD

TWIN WORKLIGHTS (Optional)

BX1880: 7.6 in.
BX2380/BX2680
BX23S: 8.4 in.

More control, more comfort, more space.

The redesigned instrument panel is more modern and stylish. It features familiar, easy to read indicators that display all the information you need to safely and efficiently operate your BX Series tractor. A fully padded high-back reclining deluxe seat with adjustable armrests, a new tilt steering wheel, and more legroom on the deck help keep you working at maximum efficiency and in maximum comfort.

HIGH-BACK RECLINING DELUXE SEAT

A new deluxe seat helps keep the operator working comfortably and efficiently, even on the most demanding of tasks. The high-back reclining seat is fully adjustable and equipped with adjustable armrests. Soft cushioning supports the back and legs for optimum operator comfort. (Except BX1880/BX23S)

EASY TO READ INSTRUMENT PANEL

The new BX80 Series' instrument panel offers easy to read indicators for all of the vital information you need to keep your tractor running smoothly, safely, and efficiently. A single glance at the redesigned instrument panel tells you everything you need to know about the major functions and condition of your BX80 Series tractor. The large tachometer in the center features a convenient orange indicator for the optimum rpm range for loader/backhoe operations.

NEW TILT STEERING WHEEL

Repositioned for greater comfort and steering control, the BX80 Series steering wheel also tilts to accommodate operators of all shapes and sizes. (Except BX1880)

CRUISE CONTROL

Cruise control automatically maintains a constant speed, letting you take your foot off the forward pedal. It's the easy way to mow large areas or travel long distances. (Optional on BX1880)

EASY-TO-USE HST TRANSMISSION

HST offers fast and smooth forward and reverse speed and direction changes via twin foot pedals that leave your hands free for steering and implement control.

SPACIOUS OPERATOR AREA

Operator comfort has been enhanced by a fully flat deck layout with the brake on the left side, providing more room for your feet. The new design also improves operability.

A. HYDRAULIC POWER STEERING

B. LEFT-SIDE BRAKE PEDAL

C. FULLY FLAT FLOOR FOR INCREASED LEGROOM

D. CUP HOLDER

E. HAND RAIL

F. 12V SOCKET & STORAGE COMPARTMENT

G. DELUXE LEVER GUIDE

H. TOOL BOX (Optional)

I. FOLDABLE ROPS

New Easy-Over decks in 54" and 60" sizes.

Kubota's Easy-Over mid-mount mower decks are available on BX Series tractors. Easy-Over decks can be quickly and easily attached and removed. First, slide out the 40-degree ramps and release the rear spring-loaded wheels. Next, drive over the deck. Engage the Rear Deck Lock and the one-touch universal joint lever. Finally, retract the ramps, raise the deck, and start mowing!

Step 1:
Slide out the ramps and release the gauge wheels.

Step 2:
Drive over the deck.

Step 3:
Lock the deck in place with the easy to use Rear Deck Lock.

Step 4:
Connect the PTO shaft using the easy one touch lever and set the gauge wheels.

CLASS-LEADING DRIVE-OVER MOWER DECK GROUND CLEARANCE

The Easy-Over mid-mount mower deck features a full 6 inches of transport ground clearance — best among sub-compact tractor drive-over mower decks. Class-leading ground clearance means much better clearance over otherwise damaging obstacles.

DRIVE-OVER MOWER ATTACHMENT KIT (Optional for BX23S)

This optional drive-over mower attachment kit lets you attach either the 54" or 60" Easy-Over mower deck to your BX23S tractor.

** Prototype version of mower deck shown in photos above.*

Prototype version of mower deck shown in photos above.

Easy to drive, easy to maneuver.

The versatile BX Series tractors are easy to drive and maneuver, letting you take on the most challenging mowing jobs with confidence and efficiency. No longer than a standard garden tractor, BX Series tractors slip easily between trees and other tight places in the yard. Their compact size also means they're gentle to the turf. The Easy-Over mid-mount mower deck is quick to attach and detach, and is available in two sizes—54" and 60"—to match your specific mowing needs.

MID-MOUNT MOWER

STANDARD DECK

This 3-blade mower offers a wide cutting area, allowing you to cut more grass in a single pass. Choose a 48"/54" deck for the BX1880 or a 54"/60" deck for the BX2380/BX2680/BX23S.

HIGH CLEARANCE

With 6 inches of clearance – more than any other tractor in their class – the BX-Series tractors easily travel over uneven ground and protruding obstacles.

MOWING-HEIGHT ADJUSTMENT DIAL

A simple twist of the dial adjusts the mower height in 1/4" increments to your desired cutting level.

DURABLE SHAFT DRIVE

The BX Series' shaft drive delivers power smoothly from the mid-PTO to the mid-mount mower. Unlike belt drives, there is no slippage and maintenance is minimal.

EASY ATTACH/DETACH

The mower can be attached and detached quickly and easily—saving you time and effort.

Faster, simpler attachment of implements.

FRONT LOADER Kubota Swift-Tach Loader

Attaching and detaching the front loader couldn't be easier! Kubota's new Swift-Tach Loader system lets you do it without getting down from the tractor! To detach the front loader, simply follow the four steps and then back away. Reattaching the front loader is just as simple and convenient: just follow the steps in reverse order.

CURVED FRONT LOADER BOOM

The BX's rounded boom perfectly complements the new overall tractor design. But its benefits don't end there. It also offers greater visibility.

HOSE PROTECTION

The loader hoses are tucked inside the boom for greater protection and better operator visibility.

2-LEVER QUICK COUPLER

Kubota's 2-lever quick coupler speeds-up and simplifies the changing of front attachments.

FRONT LOADER-MOUNTED IMPLEMENTS (Optional)

Front loader attachments include pallet forks and 60" front blade, making the BX-Series even more versatile.

FRONT AXLE CAPACITY

The BX-Series' front axle is built for serious heavy-lifting work, from hauling loaded buckets to moving pallets of materials.

LEVEL INDICATOR (Optional)

FRONT GUARD (Optional/Standard with loader)

SIMULTANEOUSLY ATTACH AND DETACH ALL FOUR HYDRAULIC LINES

The BX80 Series features a new system for attaching and detaching all four hydraulic lines at the same time, making it even faster and easier to change front-mounted implements. The no-spill type coupler help keep your tractor's frame clean and oil-free.

Kubota Swift-Tach Loader

Four simple steps, performed from your seat, is all it takes to attach and detach the front loader.

Step 1: Lift the loader boom and fully dump the bucket. Pull stand release lever to lower the front loader stand. Reposition the bucket so that it is in slightly dumped (20 degrees dump position) and lower the boom until the front axle is off the ground.

Step 2: Unlatch the loader latch levers to detach the front loader hooks.

Step 3: Use the loader lever to remove the loader frame from the mast. Turn off the engine and move the loader joystick lever to relieve the hydraulic pressure.

Step 4: Pull one lever to quickly and easily detach the hydraulic lines as a unit and store the coupler on the loader boom.

Back away and now you are done!

BX23S

Already ready to meet all of your needs around your property.

From the moment you bring it home, the BX23S is ready to go to work loading, mowing, digging, and more. It comes with a performance-matched and fully integrated backhoe and front loader as standard equipment. Kubota's new Swift-Connect and Swift-Tach systems let you quickly and easily attach the backhoe (Swift-Connect) and front loader (Swift-Tach). A heavy-duty reinforced frame provides the durability, stability, and strength to complete any tough task.

SIMULTANEOUSLY ATTACH AND DETACH ALL FOUR HYDRAULIC LINES

The BX80 Series features a new system for attaching and detaching all four hydraulic lines at the same time, making it even faster and easier to change front-mounted implements. The no-spill type coupler helps keep your tractor's frame clean and oil-free.

2-LEVER QUICK COUPLER

Kubota's 2-lever quick coupler speeds up and simplifies the changing of front attachments.

FRONT GUARD

The stylish new front guard has been redesigned to fold downwards for easier opening of the hood.

EASILY ATTACH/DETACH SWIFT-TACH LOADER

Kubota's 4-step Swift-Tach Loader mounting system simplifies the attachment and detachment of the front loader without getting off the tractor. No tools required!

FOLDABLE ROPS

The BX23S's Rollover Protective Structure (ROPS) quickly folds without tools, letting the BX23S easily pass under low obstructions. It also makes storage in a garage or shed a snap.

(Note: Kubota recommends that the ROPS be in the up position during most operations.)

LEVEL INDICATOR (Optional)

HOSE PROTECTION

CURVED FRONT LOADER BOOM

FRONT LOADER ATTACHMENTS (Optional)

Optional loader attachments include pallet fork and front blade, giving the BX23S even greater versatility.

BOLT ON CUTTING EDGE (Optional)

THIRD FUNCTION VALVE (Optional)

The optional 3rd function valve broadens the scope of the front loader operation by enabling use of a grapple bucket and other hydraulically controlled attachments. The 3rd function valve can be activated with buttons located on the grip of the joystick.

Convenience and performance in a compact backhoe.

BACKHOE Kubota Swift-Connect Backhoe

It may be compact, but the BX23S's backhoe offers jumbo size convenience and performance. It features a spacious, comfortable operator station with ample legroom, as well as a curved boom, 20° angle of departure, hydraulic hose protection, wide sight lines, and the Kubota Swift-Connect mounting system for quick and simple attachment/detachment of the backhoe. It's the ideal combination of convenience and performance for all your digging jobs.

WIDE VIEW

Tucking the hydraulic hoses inside the backhoe boom provides two great benefits—protection for the hoses and greater visibility for the operator.

CURVED BOOM

A curved boom not only allows you to dig deeper without contacting the edges of the excavation area, it also increases lifting height.

MECHANICAL THUMB (Optional)

A positionable mechanical thumb gives the BX23S the ability to grasp and move logs, landscaping materials, and other items with ease, greatly expanding the types of jobs you can do around your property.

REVERSIBLE SEAT

When it's time to switch from using the tractor or loader to using the backhoe, simply lift the reversible seat and swivel it to the back. The seat also can be adjusted forward and backward for optimal operator comfort.

BOOM AND SWING CYLINDER CUSHION VALVES

Standard on the BX23S, an integrated cushion valve ensures smooth movement both horizontally and vertically, minimizing the shock that's transmitted to the operator when the backhoe arm hits its range limits.

NO-SPILL COUPLER

The backhoe uses the same No-Spill coupler system as the front loader to keep your backhoe clean and oil-free.

KUBOTA SWIFT-CONNECT

A simple lever operation is all it takes to quickly detach the backhoe from the BX23S, letting you drive away. To reattach, just back the BX23S into the backhoe and let the auto-lock mechanism secure them together.

20° ANGLE OF DEPARTURE

Steep inclines pose no problem for the BX23S, thanks to its 20° angle of departure. It also means the tractor can be loaded onto trailers with the backhoe mounted.

PROTECTED HOSES

Tucking the hydraulic hoses inside the backhoe boom helps protect them from damage and the elements, thereby increasing their service life.

LEVER BOOTS

Boots at the bottom of the backhoe levers help protect the operating mechanisms from the elements as well as ensure smoother operation and longer service life.

MORE LEGROOM

Wide steps on each side of the boom controls provide more room—and comfort—for the operator's legs and feet.

IMPLEMENTS

From digging and scraping to mowing and plowing, there's a BX Series implement that can do it faster, easier, and more efficiently. Kubota's new hitch system lets you quickly and easily connect a much wider range of implements, including a Kubota pallet fork and snow blade, as well as implements from other manufacturers. Also available is the Land Pride 3-point quick hitch which will allow for easy attaching and detaching of approved 3-point implements, often without ever having to get off the tractor!
